Engaging Science Educators

Inquiry Based Teaching in Life Sciences Massive Online Open Course (Rerun)

Why?

The **'Inquiry Based Teaching in Life Sciences' MOOC** is meant to enhance life sciences teachers' pedagogical competencies and practices, and improve their conceptual understanding of life science to help them further establish and disseminate **Inquiry-Based Science Education (IBSE)**.

Course information:

Start date: Monday, **9th April 2019**

Duration: **6.5 weeks**

Number of modules: **5 (one module per week)**

and 1.5 extra weeks at the end of the course in order for participants to submit their final course activity and review the activity of three of their peers.

Content:

- ✓ Experience Inquiry as an **adult learner**
- ✓ Acquire the **skills and confidence** to implement Inquiry Based Teaching in the classroom
- ✓ Learn how to **reflect on your own teaching practice**
- ✓ Enhance your personal and your **students'** conceptual understanding of life sciences
- ✓ Explore various formal and informal **assessment approaches for IBSE**

For whom?

Life science teachers (of 12-19 year old students) from Europe and beyond.
